

WHAT IS CLAIMED IS:

1. A mounting bracket for mounting a high voltage surge arrester to a power distribution system, comprising:
a main body having a first end securable to the high voltage surge arrester and an opposite second end securable to a bracket of a power distribution system and a plurality of laterally extending weathersheds located between said first and second ends, said second end including a fastening hole that receives a fastener for attaching said second end to the power distribution system bracket, and said main body being formed of polymer plastic blend.
2. A mounting bracket according to claim 1, wherein
said main body includes an inner rigid rod extending substantially the entire length of said main body.
3. A mounting bracket according to claim 2, wherein
said inner rigid rod includes a fastening hole that is aligned with said fastening hole of said main body for receiving said fastener.
4. A mounting bracket according to claim 3, wherein
said inner rigid rod is formed of fiberglass.
